Overview

General overview

All three presenters clearly explained the information presented during the slide presentation

No and Why:

Too long. We are working people. Need to get important info (highlights) and go. No workshop should exceed 1.5 hours. There also needs to be a break of the session is this long and an opportunity to ask questions & interact. Listening to folks dron on and on was painful. On a positive note the panelists were terrific and clearly know their stuff. Great info.
